DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8, 15-20, 22, 23, 25, and 27-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 – the preamble should recite more than a catheter as being claimed since the device now includes the catheter in combination with a current source; “the distal end” in line 4 lacks antecedent basis; and current source should be connected with the electrical conductor via the terminal. Claim 15 – the preamble should recite more than a catheter as being claimed since the device now includes the catheter in combination with a current source and current source should be connected with the electrical conductor via the electrical terminal. Claim 23 – the delivering step should deliver the electrical currents through the electrical conductors to the cardiac tissue via the electrode. Claim 25 – the preamble should recite more than a catheter as being claimed since the device now includes the catheter in combination with a current source. The preambles of the various dependent claims should be consistent with any amendments made to the independent claims to overcome the above rejections.
